International Journal of Mass Spectrometry and Ion Processes

# Subject Index

Ab initio studies
Combined infrared and ab initio study of the $H_2$–$HN_2^+$ complex 167
Acetonitrile
Kinetic study of protonated methanol clusters with acetonitrile 521
Afterglow plasmas
An on-line Langmuir probe technique for the study of afterglow plasmas 299
$Al^+$ chemistry
Isotope effects in radiative cooling: the $Al(C_6H_6)^+$ system 1
Appearance energy
Determination of the proton affinity and absolute heat of formation of cyclopropenylidene 257
$Ar^+$–He collisions
Determination of cross-section for $Ar^+$–He elastic collisions from drift velocity data: Monte Carlo simulation 179
Argon
State-selected charge transfer reaction of $CO^+(X, v; A, v')$ with Ar 161
Argon clusters
Resonant formation of cluster anions containing $SF_6$ involving a pick-up experiment with argon and nitrogen clusters 27
Association reaction
Selected ion flow drift tube studies of the kinetics of the reactions of $Si^+(^2P)$ with $C_2H_2$ and $C_6H_6$ 499
Studies of the formation of cluster ions $NH_4^+ \cdot (NH_3)_n$, $n = 1$–4, using a high pressure flowing afterglow apparatus 187
The association reaction $C_2H_3^+ + CO$ and interstellar propynal 251
Astrophysical plasmas
Ion/molecule reactions in astrophysical plasmas 429
Atmospheric ions
Chemistry of atmospheric ions reacting with fully fluorinated compounds 287
Autodestruction
Effect of temperature on the formation and autodestruction of parent anions 59
Bimolecular reaction
Selected ion flow drift tube studies of the kinetics of the reactions of $Si^+(^2P)$ with $C_2H_2$ and $C_6H_6$ 499
Breath gas analysis
Proton transfer reaction mass spectrometry: on-line trace gas analysis at the ppb level 609
Brominated ethanes
Low energy electron attachment to brominated ethanes and ethylenes 123
Brominated ethylenes
Low energy electron attachment to brominated ethanes and ethylenes 123
Bromoacetonitrile
Electron attachment to haloacetonitriles, 295–556 K 423
Carbon cluster anions
Carbon cluster anions: structure and growth from $C_5^-$ to $C_{62}^-$ 217
$CCl_4$
A crossed beam high resolution study of dissociative electron attachment to $CCl_4$ 311
$C_6F_6^-$ formation
Effective intermolecular relaxation in $(C_6F_6)_n^-$ clusters: mechanism of $C_6F_6^-$ formation on low energy electron impact 79
$C_7F_{14}$ molecular anion
Fates of the molecular anions of $SF_6$ and $C_7F_{14}$ upon recombination with positive ions 87
$C_3H_3O^+$ ions
The association reaction $C_2H_3^+ + CO$ and interstellar propynal 251
Charge transfer reactions
Charge transfer reactions between $D^+$, $O^+$, $Ar^+$, $Kr^+$ and $Xe^+$ with $CH_4$, $C_2H_6$ and $C_3H_8$ at relative energies 1–10 eV 529

Chloroacetonitrile
Electron attachment to haloacetonitriles, 295–556 K 423
Cluster anions
Resonant formation of cluster anions containing $SF_6$ involving a pick-up experiment with argon and nitrogen clusters 27
Cluster fragmentation
On the dynamics of the reaction of positive hydrogen cluster ions ($H_5^+$ to $H_{23}^+$) with para and normal hydrogen at 10 K 373
Cluster growth
On the dynamics of the reaction of positive hydrogen cluster ions ($H_5^+$ to $H_{23}^+$) with para and normal hydrogen at 10 K 373
Cluster ions
Metastable decay of propane ($CH_3CD_2CH_3$)- and argon/propane-cluster ions induced by isomerization of a propyl ion core and fragmentation patterns of propane ions in the cluster environment 415
Studies of the formation of cluster ions $NH_4^+ \cdot (NH_3)_n$, $n = 1$–4, using a high pressure flowing afterglow apparatus 187
Clustering reaction
Studies of the formation of cluster ions $NH_4^+ \cdot (NH_3)_n$, $n = 1$–4, using a high pressure flowing afterglow apparatus 187
Clusters
Kinetic study of protonated methanol clusters with acetonitrile 521
Effective intermolecular relaxation in $(C_6H_6)_n^-$ clusters: mechanism of $C_6F_6^-$ formation on low energy electron impact 79
$CO^+$
State-selected charge transfer reaction of $CO^+(X, v; A, v')$ with Ar 161
Cold molecular ions
Ion/molecule reaction rate coefficients at translational temperatures below 5 K: selected bimolecular reactions of $C_2H_2^+$ and $NH_4^+$ 199
Collision-induced dissociation
Collision-induced dissociation of $N_3^+(X^3\Sigma^-)$ with Ne, Ar, Kr, and Xe 267
Complex hydrocarbons
The interstellar gas phase production of highly complex hydrocarbons: construction of a model 321
Coupled cluster calculations
Large-scale coupled cluster calculations for the linear carbon anions $C_3^-$, $C_4^-$, $C_7^-$ and $C_{10}^-$ 621
Cross beams
Electron impact ionization of spatially oriented $CH_3Cl$ and $CCl_3H$ 279
Cross-sections
A crossed beam high resolution study of dissociative electron attachment to $CCl_4$ 311
Determination of cross-section for $Ar^+$–He elastic collisions from drift velocity data: Monte Carlo simulation 179
Low energy electron attachment to brominated ethanes and ethylenes 123
Cyclopropenyl cation
Determination of the proton affinity and absolute heat of formation of cyclopropenylidene 257
Cyclopropenylidene
Determination of the proton affinity and absolute heat of formation of cyclopropenylidene 257

Database
Relating ion/neutral reaction rate coefficients and cross-sections by accessing a database for ion transport properties 555
De-ionization
Recombination of $H_3^+$ and $D_3^+$ ions in a flowing afterglow plasma 131
Deuterium
The chemistry of complex molecules in interstellar clouds 389
Diamond films
Molecular processes in $CH_4$–$H_2$ plasmas diluted with rare gases: reactions of X* atoms and $X^+$ ions (X = Ne and Ar) with methane molecules 345
Discrete electrode detector array
Simulation of a discrete electrode detector array performance 439
Dissociative electron capture
Use of Rydberg atoms as a nanoscale laboratory to examine dissociative electron capture 37
Dissociative recombination
Dissociative recombination in ion storage rings 403
FALP and CRESU studies of ionic reactions 573
Recombination of $H_3^+$ and $D_3^+$ ions in a flowing afterglow plasma 131
The semiclassical–classical path theory of direct electron–ion dissociative recombination and $e^- + H_3^+$ recombination 597
$\pi$-Donating ligands
Reactions of $Fe^+$ coordinated to the $\pi$-donating ligands $C_2H_4$, c-$C_5H_5$, $C_6H_6$ and $C_{60}$ with $N_2O$ and CO: probing the bonding in $(C_{60})Fe^+$ 543

Drift velocity
Determination of cross-section for $Ar^+$–He elastic collisions from drift velocity data: Monte Carlo simulation 179

e–$H_3^+$ recombination
The semiclassical–classical path theory of direct electron–ion dissociative recombination and $e^- + H_3^+$ recombination 597
Elastic collisions
Determination of cross-section for $Ar^+$–He elastic collisions from drift velocity data: Monte Carlo simulation 179
Electron attachment
A crossed beam high resolution study of dissociative electron attachment to $CCl_4$ 311
Electron attachment to haloacetonitriles, 295–556 K 423
Low energy electron attachment to brominated ethanes and ethylenes 123
Electron cooling
Dissociative recombination in ion storage rings 403
Electron emission statistics
Ion-induced electron emission from solid surfaces: information content of the electron number statistics 45
Electron impact
Electron impact ionization of spatially oriented $CH_3Cl$ and $CCl_3H$ 279
Electron transfer
The interplay between electron transfer and attack on halogen in gas-phase reactions of negative ions with fluoro-chloromethanes and fluoro-bromomethanes 99
Electron/ion recombination
Electron/ion recombination in dense gaseous Xe 451

FALP
FALP and CRESU studies of ionic reactions 573
Flowing afterglow
Electron attachment to haloacetonitriles, 295–556 K 423
Studies of the formation of cluster ions $NH_4^+ \cdot (NH_3)_n$, $n = 1$–4, using a high pressure flowing afterglow apparatus 187
Flowing afterglow plasmas
Recombination of $H_3^+$ and $D_3^+$ ions in a flowing afterglow plasma 131
Fluorinated compounds
Chemistry of atmospheric ions reacting with fully fluorinated compounds 287
Fluoroacetonitrile
Electron attachment to haloacetonitriles, 295–556 K 423
Fourier transform ion cyclotron resonance
Isotope effects in radiative cooling: the $Al(C_6H_6)^+$ system 1
Fragmentation spectroscopy
Fragmentation spectroscopy of photoionized $Fe(CO)_5$: a molecular model for a heterogeneous cluster 513
FT-ICR
Radiative lifetimes for an ion of astrophysical interest: $HCO^+$ 487
The interplay between electron transfer and attack on halogen in gas-phase reactions of negative ions with fluoro-chloromethanes and fluoro-bromomethanes 99
Fullerenes
The interstellar gas phase production of highly complex hydrocarbons: construction of a model 321

Gas phase model
The interstellar gas phase production of highly complex hydrocarbons: construction of a model 321

$H_2^+$
Super-dissociative recombination of $H_2^+$? 153
$H_3^+$
Recombination of $H_3^+$ and $D_3^+$ ions in a flowing afterglow plasma 131
$H_2$–$HN_2^+$ complex
Combined infrared and ab initio study of the $H_2$–$HN_2^+$ complex 167
Halogen attack
The interplay between electron transfer and attack on halogen in gas-phase reactions of negative ions with fluoro-chloromethanes and fluoro-bromomethanes 99
Halomethanes
The interplay between electron transfer and attack on halogen in gas-phase reactions of negative ions with fluoro-chloromethanes and fluoro-bromomethanes 99
$HCO^+$
Radiative lifetimes for an ion of astrophysical interest: $HCO^+$ 487
Heterogeneous cluster model
Fragmentation spectroscopy of photoionized $Fe(CO)_5$: a molecular model for a heterogeneous cluster 513
High energy resolution
A crossed beam high resolution study of dissociative electron attachment to $CCl_4$ 311

Hot molecular cores
The chemistry of complex molecules in interstellar clouds 389

Infrared spectra
Combined infrared and ab initio study of the $H_2$–$HN_2^+$ complex 167
Intermolecular relaxation
Effective intermolecular relaxation in $(C_6H_6)_n^-$ clusters: mechanism of $C_6F_6^-$ formation on low energy electron impact 79
Interstellar clouds
The chemistry of complex molecules in interstellar clouds 389
The interstellar gas phase production of highly complex hydrocarbons: construction of a model 321
Interstellar propynal
The association reaction $C_2H_3^+ + CO$ and interstellar propynal 251
Ion storage rings
Dissociative recombination in ion storage rings 403
Ion transport properties
Relating ion/neutral reaction rate coefficients and cross-sections by accessing a database for ion transport properties 555
Ion/ion recombination
Fates of the molecular anions of $SF_6$ and $C_7F_{14}$ upon recombination with positive ions 87
Ion/molecule reactions
FALP and CRESU studies of ionic reactions 573
Ion/molecule reaction rate coefficients at translational temperatures below 5 K: selected bimolecular reactions of $C_2H_2^+$ and $NH_4^+$ 199
Ion/molecule reactions in astrophysical plasmas 429
Isotope effects in radiative cooling: the $Al(C_6H_6)^+$ system 1
Kinetic study of protonated methanol clusters with acetonitrile 521
Molecular processes in $CH_4$–$H_2$ plasmas diluted with rare gases: reactions of X* atoms and $X^+$ ions (X = Ne and Ar) with methane molecules 345
Reactions of $Fe^+$ coordinated to the $\pi$-donating ligands $C_2H_4$, c-$C_5H_5$, $C_6H_6$ and $C_{60}$ with $N_2O$ and CO: probing the bonding in $(C_{60})Fe^+$ 543
Selected ion flow drift tube studies of the kinetics of the reactions of $Si^+(^2P)$ with $C_2H_2$ and $C_6H_6$ 499
The interplay between electron transfer and attack on halogen in gas-phase reactions of negative ions with fluoro-chloromethanes and fluoro-bromomethanes 99
Ion/neutral reactions
Relating ion/neutral reaction rate coefficients and cross-sections by accessing a database for ion transport properties 555
Ionic hydrogen clusters
On the dynamics of the reaction of positive hydrogen cluster ions ($H_5^+$ to $H_{23}^+$) with para and normal hydrogen at 10 K 373
Ionization
Electron impact ionization of spatially oriented $CH_3Cl$ and $CCl_3H$ 279
Iron carbonyl
Fragmentation spectroscopy of photoionized $Fe(CO)_5$: a molecular model for a heterogeneous cluster 513
Iron/cation reactivity
Reactions of $Fe^+$ coordinated to the $\pi$-donating ligands $C_2H_4$, c-$C_5H_5$, $C_6H_6$ and $C_{60}$ with $N_2O$ and CO: probing the bonding in $(C_{60})Fe^+$ 543
Iron/fullerene cation
Reactions of $Fe^+$ coordinated to the $\pi$-donating ligands $C_2H_4$, c-$C_5H_5$, $C_6H_6$ and $C_{60}$ with $N_2O$ and CO: probing the bonding in $(C_{60})Fe^+$ 543
Isomerization
Metastable decay of propane $(CH_3CD_2CH_3)$- and argon/propane-cluster ions induced by isomerization of a propyl ion core and fragmentation patterns of propane ions in the cluster environment 415
Isotope effects
Isotope effects in radiative cooling: the $Al(C_6H_6)^+$ system 1

Kinetic emission
Ion-induced electron emission from solid surfaces: information content of the electron number statistics 45
Kinetics
Kinetic study of protonated methanol clusters with acetonitrile 521

Langmuir probe
An on-line Langmuir probe technique for the study of afterglow plasmas 299
Laser fluorescence
Laser fluorescence and mass spectrometric measurements of vibrational relaxation of $N_2^+(v)$ with He, Ne, Ar, Kr, and Xe 469
Linear carbon anions
Large-scale coupled cluster calculations for the linear carbon anions $C_3^-$, $C_4^-$, $C_7^-$ and $C_{10}^-$ 621

Low temperature ion/molecule reaction
On the dynamics of the reaction of positive hydrogen cluster ions ($H_5^+$ to $H_{23}^+$) with para and normal hydrogen at 10 K 373

Magnetic analysis
Magnetic analysis of nearly effusive and moderately supersonic beams of oxygen molecules 355
Metastable atom reactions
Molecular processes in $CH_4$–$H_2$ plasmas diluted with rare gases: reactions of X* atoms and $X^+$ ions (X = Ne and Ar) with methane molecules 345
Metastable decay
Metastable decay of propane ($CH_3CD_2CH_3$)- and argon/propane-cluster ions induced by isomerization of a propyl ion core and fragmentation patterns of propane ions in the cluster environment 415
Methane dissociation
Molecular processes in $CH_4$–$H_2$ plasmas diluted with rare gases: reactions of X* atoms and $X^+$ ions (X = Ne and Ar) with methane molecules 345
Molecular beams
Magnetic analysis of nearly effusive and moderately supersonic beams of oxygen molecules 355
Molecular ions
Dissociative recombination in ion storage rings 403
Monitor ion technique
Radiative lifetimes for an ion of astrophysical interest: $HCO^+$ 487
Monte Carlo simulations
Determination of cross-section for $Ar^+$–He elastic collisions from drift velocity data: Monte Carlo simulation 179

Negative ions
Electron attachment to haloacetonitriles, 295–556 K 423
Neutral/neutral reactions
Neutral/neutral reactions without barriers: comparisons with ion/molecule systems and their possible role in the chemistry of interstellar clouds 231
Nitrogen
Collision-induced dissociation of $N_3^+(X^3\Sigma^-)$ with Ne, Ar, Kr, and Xe 267
Nitrogen clusters
Resonant formation of cluster anions containing $SF_6$ involving a pick-up experiment with argon and nitrogen clusters 27
Nonadiabatic effect
Magnetic analysis of nearly effusive and moderately supersonic beams of oxygen molecules 355
Nonelastic scattering
Vibrational relaxation in $NO^+$–He: accurate quantum mechanical study 207

Oriented molecules
Electron impact ionization of spatially oriented $CH_3Cl$ and $CCl_3H$ 279
Oxygen
Magnetic analysis of nearly effusive and moderately supersonic beams of oxygen molecules 355

Parent anion formation
Effect of temperature on the formation and autodestruction of parent anions 59
Particle-induced electron emission
Ion-induced electron emission from solid surfaces: information content of the electron number statistics 45
Photoionization
Fragmentation spectroscopy of photoionized $Fe(CO)_5$: a molecular model for a heterogeneous cluster 513
Plasma diagnostic
Magnetic analysis of nearly effusive and moderately supersonic beams of oxygen molecules 355
Plasma-enhanced chemical vapor deposition
Molecular processes in $CH_4$–$H_2$ plasmas diluted with rare gases: reactions of X* atoms and $X^+$ ions (X = Ne and Ar) with methane molecules 345
Polycyclic aromatic hydrocarbons
The chemistry of complex molecules in interstellar clouds 389
Potential emission
Ion-induced electron emission from solid surfaces: information content of the electron number statistics 45
Potential energy surface
Vibrational relaxation in $NO^+$–He: accurate quantum mechanical study 207
Proton affinity
Determination of the proton affinity and absolute heat of formation of cyclopropenylidene 257
Proton transfer reaction mass spectrometry (PTR-MS)
Proton transfer reaction mass spectrometry: on-line trace gas analysis at the ppb level 609
Proton-bound ethanol clusters
The reactivity of neat and mixed proton-bound ethanol clusters 13
Protonated methanol
Kinetic study of protonated methanol clusters with acetonitrile 521

Radiative cooling
Isotope effects in radiative cooling: the $Al(C_6H_6)^+$ system 1
Radiative lifetimes
Radiative lifetimes for an ion of astrophysical interest: $HCO^+$ 487
Rare gas atoms
Laser fluorescence and mass spectrometric measurements of vibrational relaxation of $N_2^+(v)$ with He, Ne, Ar, Kr, and Xe 469
Rare gases
Collision-induced dissociation of $N_3^+(X^3\Sigma^-)$ with Ne, Ar, Kr, and Xe 267
Rate coefficients
Ion/molecule reaction rate coefficients at translational temperatures below 5 K: selected bimolecular reactions of $C_2H_2^+$ and $NH_4^+$ 199
Laser fluorescence and mass spectrometric measurements of vibrational relaxation of $N_2^+(v)$ with He, Ne, Ar, Kr, and Xe 469
Low energy electron attachment to brominated ethanes and ethylenes 123
Neutral/neutral reactions without barriers: comparisons with ion/molecule systems and their possible role in the chemistry of interstellar clouds 231
Relating ion/neutral reaction rate coefficients and cross-sections by accessing a database for ion transport properties 555
Selected ion flow drift tube studies of the kinetics of the reactions of $Si^+(^2P)$ with $C_2H_2$ and $C_6H_6$ 499
Reaction complex
Selected ion flow drift tube studies of the kinetics of the reactions of $Si^+(^2P)$ with $C_2H_2$ and $C_6H_6$ 499
Reaction dynamics
On the dynamics of the reaction of positive hydrogen cluster ions ($H_5^+$ to $H_{23}^+$) with para and normal hydrogen at 10 K 373
Rydberg atoms
Use of Rydberg atoms as a nanoscale laboratory to examine dissociative electron capture 37

Selected ion flow tube
The reactivity of neat and mixed proton-bound ethanol clusters 13
Selected-ion flow drift tube
Selected ion flow drift tube studies of the kinetics of the reactions of $Si^+(^2P)$ with $C_2H_2$ and $C_6H_6$ 499
Semiclassical–classical path theory
The semiclassical–classical path theory of direct electron–ion dissociative recombination and $e^- + H_3^+$ recombination 597
$SF_6$
Resonant formation of cluster anions containing $SF_6$ involving a pick-up experiment with argon and nitrogen clusters 27
$SF_6$ molecular anion
Fates of the molecular anions of $SF_6$ and $C_7F_{14}$ upon recombination with positive ions 87
SIFT
Chemistry of atmospheric ions reacting with fully fluorinated compounds 287
Laser fluorescence and mass spectrometric measurements of vibrational relaxation of $N_2^+(v)$ with He, Ne, Ar, Kr, and Xe 469
The association reaction $C_2H_3^+ + CO$ and interstellar propynal 251
SIFT technique
Reactions of $Fe^+$ coordinated to the $\pi$-donating ligands $C_2H_4$, c-$C_5H_5$, $C_6H_6$ and $C_{60}$ with $N_2O$ and CO: probing the bonding in $(C_{60})Fe^+$ 543
Simulation
Simulation of a discrete electrode detector array performance 439
State-selected charge transfer
State-selected charge transfer reaction of $CO^+(X, v; A, v')$ with Ar 161
Super-dissociative recombination
Super-dissociative recombination of $H_2^+$? 153
s-Wave capture
A crossed beam high resolution study of dissociative electron attachment to $CCl_4$ 311

Temperature effect
Effect of temperature on the formation and autodestruction of parent anions 59
Trace components in air
Proton transfer reaction mass spectrometry: on-line trace gas analysis at the ppb level 609
Triple quadrupole
Determination of the proton affinity and absolute heat of formation of cyclopropenylidene 257

Vibrational relaxation
Laser fluorescence and mass spectrometric measurements of vibrational relaxation of $N_2^+(v)$ with He, Ne, Ar, Kr, and Xe 469
Vibrational relaxation in $NO^+$–He: accurate quantum mechanical study 207

Xenon
Electron/ion recombination in dense gaseous Xe 451
